

# OTHMANE TANJI

(212) 662-176237 | French/English | [othmanetanji@outlook.com](mailto:othmanetanji@outlook.com) | [Portfolio](#) | [LinkedIn](#)

## EDUCATION

### École Marocaine des Sciences de l'Ingénieur (EMSI)

Sep. 2021 - Jun. 2026

*Bachelor of Engineering - Computer Science and Network Security*

Operating Systems - Computer Networks & Security - Database Design - Software Development - Cloud Computing

### Baccalauréat in Physics & Chemistry

Jun. 2020

## TECHNICAL SKILLS

**Networking & Security:** Linux & Windows Server administration, Active Directory, TCP/IP, VLAN, VPN, SD-WAN, Firewall administration, IDS/IPS, Security Monitoring & Incident Response, System, Network & Infrastructure Administration.

**Cloud, Virtualization & Automation:** Microsoft Azure, Virtualization, Python, Bash, SQL, Artificial Intelligence (LLMs, RAG, MCP), Deep Learning (CNN, ANN, RNN, LSTM).

## TECHNICAL EXPERIENCE

### Network & Security Operations Center (NSOC) Intern (PFE)

Feb. 2026 - Aug. 2026

*Orange Business France*

- Monitored enterprise network and security infrastructures to ensure service availability and operational continuity.
- Analyzed and managed incidents, coordinating escalations to L2/L3 teams while ensuring SLA compliance.
- Administered Linux & Windows systems and supported enterprise infrastructure maintenance and troubleshooting.
- Assisted in the administration of virtualization platforms and secure network infrastructures
- Ensured operational availability and service continuity through proactive monitoring and incident follow-up.
- Contributed to an AI-driven PFE project focused on automating network & security ops & incident management.

### IT Infrastructure & Cyber-Security Intern

Jul. 2025 - Sep. 2025

*Sanofi Morocco*

- Integrated vulnerability assessment results into a SIEM-based Security Operations Center (SOC) to improve threat visibility and enable intelligent security alert prioritization.
- Deployed and administered Wazuh, Microsoft Sentinel, Suricata IDS, OpenVAS, and pfSense to strengthen enterprise security monitoring and vulnerability management.
- Correlated vulnerability data, security events, and network telemetry to support incident analysis and accelerate remediation activities.
- Contributed to the development of an AI-assisted approach for prioritizing security alerts based on vulnerability severity, asset criticality, and contextual risk.

### Cloud Infrastructure Intern

*Marjane Group*

Jul. 2024 - Sep. 2024

- Deployed and administered Microsoft Azure infrastructure, including Resource Groups, VNets, Virtual Machines, Azure SQL Databases, Active Directory, Group Policy (GPO), user access management, and Network Security Groups (NSGs)

## PERSONAL PROJECTS

### Enterprise Network Security Architecture

Oct. 2025

- Designed and implemented a secure, highly available enterprise network architecture integrating pfSense, openSUSE, CARP/VRRP, VLANs, VPNs, Suricata IDS, PacketFence NAC, and virtualization based on open-source technologies.

**Certification: CompTIA Security+ (SYS-701) , A+, Network+ , Oracle GenAI Professional 2025**
